Malcolm Construction, a division of the Malcolm Group is a leading construction and waste management company specialising in civil engineering and groundworks contracts. We have a diverse infrastructure within our business allowing us to excel in the following areas of construction and material supply.

- Civil Engineering
- Earthworks / Bulk Excavation
- Groundworks / Roads Works
- Indoor & Outdoor Leisure Complexes
- Equipment Rental
- Waste Management & Recycling
- Quarry Operations

Our adaptable professional management team ensure that partnerships are evolved with our clients through adding value and providing cost savings. Innovation, together with management knowledge and expertise allows us to offer a one stop approach underpinning our reputation for delivering projects on time and within budget.

The growth in our construction business has allowed us to continually invest in our plant and tipper fleets ensuring longevity in quality and service.

“Our experience within the construction industry is wide and varied, working in partnership with high profile and well respected clients delivering a first class service”

We pride ourselves in our high standards of Health & Safety and Training, as well as our committed approach to operating in an environmentally responsible manner. Consequently, Malcolm Construction ensures a first class service is delivered every time.
